

"Design for London is using guerrilla tactics to become the most influential city architects office in the country".
Kieran Long, 2008, Architects' Journal

Shaping Berlin's Spaces: Lessons from London

29.10.2010 | Lunchtime Lecture

TU Berlin | H0111 | main building

Straße des 17. Juni 135 | 10623 Berlin

- 1:00 Harald Bodenschatz (TU Berlin):
Welcome
- 1:15 Cordelia Polinna (Think Berl!n) & Tobias Goevert (DfL):
Introduction
- 1:30 Matthew Carmona (Bartlett School of Planning, London):
London: Have we seen an Urban Renaissance?
- 2:00 Mark Brearley (Design for London):
Designing for London
- 2:30 Reiner Nagel (Senatsverwaltung für Stadtentwicklung Berlin):
Current Topics and Strategies for Berlin

© WWMA

in cooperation with:

The creation of Design for London followed the re-establishment of metropolitan government in London in 2000. Since then innovative approaches have been developed for delivering design-led urban regeneration, infrastructure and public space projects in terms of collaborating with local authorities, involving young architecture firms or public participation.

These strategies might be inspiring for other cities, for example Berlin. Berlin is also known to be a laboratory to test new ideas in urban planning, such as kick-starting urban development through temporary uses or using international building exhibitions as a means to raise design standards. Both cities suffer from great financial constraints which might lead to urban planning and design resources being scaled down. New approaches of how to achieve urban design quality are needed.

The public lunchtime lecture will give an introduction to current urban design strategies and their implementation in the two cities. The insights gained will feed into an exchange of thoughts between Design for London and the Senate Department for Urban Development Berlin.
